Experience

JMS One IT

Application Developer Intern

Lapu-Lapu, Cebu
January 2026 – April 2026

- Planned system architecture and workflow structure for a mobile application project.
- Designed mobile and web UI screens, applying UX research, responsive layouts, accessibility principles, and visual hierarchy standards.
- Developed admin web interfaces and reusable frontend components, improving UI consistency, maintainability, and scalability across project modules.
- Applied Git version control workflows, including branching, merge conflict resolution, repository management, and collaborative development practices.
- Researched and implemented a monorepo project structure, reducing duplicate dependencies and improving project organization for frontend and backend development.
- Designed a client's landing page for Tutela Marine Inc. for project proposal.
- Developed and deployed the initial prototype of a client's landing page for Tutela Marine Inc for deployment testing and design review.
- Collaborated with the development team in daily meetings, code reviews, and feedback sessions to improve project quality.

Christ for Asia International, Inc.

IT Support Intern

Guadalo, Cebu
January 2026 – March 2026

- Conducted hardware inspections and preventive maintenance on office and computer laboratory units to audit and categorize hardware availability.
- Executed physical PC cleaning, system reformatting, and clean operating system installations to restore machine usability.
- Diagnosed network connectivity issues and reconfigured Access Point devices to restore stable internet access across office workstations.
